Overview

Comprehensive Security Monitoring

This electronic guard tour system is designed for the effective monitoring of security, surveillance, and maintenance personnel. It ensures that staff adhere to established patrol routes and schedules, enhancing accountability and operational efficiency. The system integrates multiple tools into a single, compact device to support comprehensive site management.

Key Features

A multifunctional device integrating flashlight, impact recording, and data transmission capabilities.

Integrated Features

- Flashlight illumination
- Impact recording and alarm
- Pedometer for movement tracking
- USB data transmission
- Alarm clock for patrol reminders

Durability & Design

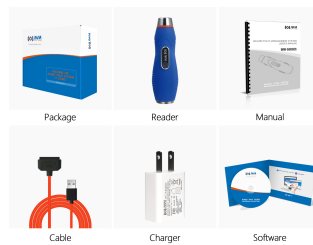

Built to withstand demanding environments with waterproof and shatter-resistant construction.

Construction Standards

Waterproof, Dustproof, Shatter-resistant, Electrostatic prevention

Package Contents

What includes the package ?

The complete system package includes all necessary hardware and software for immediate deployment.

What's in the Box

- Handheld reader device
- USB downloader
- Magnetic USB cable
- AC power adapter
- User manual
- Software CD-ROM

Technical Specifications

Features a modern magnetic USB connection for efficient charging and data transfer.

Power Requirements

100 V

Input Voltage Min

240 V

Input Voltage Max

5 V

Output Voltage

1 A

Output Current
