

# Gunmetal Bronze Ferrule Valve with Threaded Connection

This gunmetal bronze ferrule valve is designed for reliable flow control in industrial applications. It features a durable construction with threaded connections for secure installation in various fluid handling systems.

## Product Overview

### High-Performance Ferrule Valve

This gunmetal ferrule valve is engineered for demanding industrial fluid handling applications. Constructed from high-quality BS1400 LG2 bronze, it offers exceptional durability and resistance to corrosion. The design features a secure threaded connection system and reliable rubber sealing, ensuring efficient flow control and leak-free performance under pressure.

## Technical Specifications

### Maximum Pressure

**21 Bar**

Pressure Rating

### Available Sizes

- 1/2"
- 3/4"
- 1"

### Material

BS1400 LG2 Bronze

## Connection Details

### Inlet Connection

G threads

### Outlet Connection

R threads

## Compliance & Sealing

### Product Code

SV-FE0101

### Sealing Standard

BS2494 Rubber
