

GW250-1 Sport Motorcycle

This sport motorcycle features a liquid-cooled, single-cylinder engine and a six-speed transmission. It incorporates a telescopic front fork and a monoshock rear suspension for enhanced handling and rider comfort.

Overview

Performance and Design

The GW250-1 is a precision-engineered sport motorcycle designed for agility and reliable performance. Featuring a liquid-cooled, single-cylinder engine paired with a six-speed transmission, it offers a responsive and smooth riding experience. Its lightweight chassis, combined with a sophisticated suspension system, ensures excellent handling and rider comfort for various road conditions.
