

GY6-125 125CC Scooter Engine

This high-performance engine is designed for scooters. It provides reliable power and efficient fuel consumption and is suitable for a variety of scooter models.

Overview

High-Performance 125CC Scooter Engine

The GY6-125 125CC engine is a reliable and efficient power unit designed specifically for scooter applications. Engineered for consistent performance, it balances power output with fuel efficiency, making it an ideal replacement or upgrade for various scooter models. Its design prioritizes ease of installation and operational durability for professional maintenance needs.

Technical Specifications

Key Performance Metrics

13 HP

Power Output Rating

2.9 L/100km

Fuel Consumption Rating

Engine Model	GY6-125 (LK152QMI)
Displacement	125 CC
Test Report ID	20091208-01

Compatibility

Compatible Applications	Scooters, Motorcycle Parts, Replacement Engine
