

# GY6 Racing CDI Unit with 11000 RPM Limit

This racing CDI unit is designed for GY6 engines to enhance performance. It features an optimized ignition timing curve and an increased RPM limit of 11,000 for improved throttle response.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Racing CDI

This professional-grade racing CDI unit is designed to significantly enhance the performance of GY6 engines by optimizing the ignition timing curve. Unlike standard units, it features a durable aluminum heat sink casing and a silica-sand filled interior to effectively reduce heat and resist vibration. By removing the traditional rev-limiter, this unit increases the maximum engine speed up to 11,000 RPM, resulting in improved acceleration and top-end power.

## Technical Specifications

Comparison of ignition performance curves for optimized engine timing.

### Wiring Configuration

- 2-pin male plug: red, black
- 4-pin male plug: blue, yellow, 2 x green

<b>Max RPM Limit</b>	11000 RPM
<b>Engine Compatibility</b>	GY6, 1P52QMI, 1P57QMJ, P152QMI, P157QMJ, KYMCO G3

## Physical Attributes

Durable aluminum heat sink design for improved heat dissipation and reliability.

## Construction Details

Aluminum Heat Sync • Silica-sand filled • Anti-vibration

Dimensions (L x W x T)

2.89" x 1.45" x 1.17"

## Logistics

Package Quantity

50 pcs
