

# H-Type Aluminum Connecting Clamp

This H-Type connecting clamp is designed for electrical power transmission and distribution systems, ensuring a secure and reliable connection. Constructed from high-quality aluminum alloy, it offers excellent conductivity and corrosion resistance.

## Product Overview

### H-Type Aluminum Connecting Clamp

The H-Type Connecting Clamp is a specialized fitting engineered for electrical power transmission and distribution systems. Constructed from a high-quality aluminum alloy, this component ensures superior electrical conductivity and robust corrosion resistance. Its durable design is optimized for long-lasting performance, making it a reliable solution for demanding electric power fitting applications.

## Technical Specifications

### Key Features

- High electrical conductivity
- Excellent corrosion resistance
- Robust design for durability
- Secure and reliable connection

<b>Material</b>	Aluminum Alloy
<b>Application</b>	Power Transmission, Power Distribution, Electric Power Fittings
