Overview

High-Performance Digital Terrestrial Receiver

This H.265 DVB-T2 digital terrestrial receiver offers a robust solution for high-quality television signal decoding. Designed for versatility, it supports multi-bandwidth reception and a wide range of video resolutions up to 1080p, ensuring compatibility with modern display standards. With integrated USB 2.0 functionality, users can easily perform software upgrades, utilize PVR features, and enjoy time-shifting capabilities for a flexible viewing experience.

Hardware Specifications

Memory Configuration

512 Mbit
DDR2 RAM

32 Mbit
Flash Memory

Power Supply AC 100~240V 50Hz, 10W Max

Dimensions 170 x 90 x 40 mm

Tuner & Connectivity

Input Frequency VHF: 170-231MHz, UHF: 470-866MHz

Input Impedance 75 Ohm

Connectivity Ports HDMI, SCART, RF In, Loop, USB 2.0, RCA

Multimedia & Software

Video/Audio Decoding

- H.265
- H.264
- MPEG-1/2/4
- VC-1
- HE AAC
- Dolby (Optional)

User Interface Features

- 7-Day EPG
- Parental Control
- Teletext/Subtitle Support
- Time Shift
- Favorite Group Management
- 32-bit True Color OSD

File Format Support

MKV, MP4, AVI, MOV, TS, FLV, JPEG, BMP, PNG
