Product Overview

High-Performance Automotive Lighting

The H4 halogen headlight bulb is a high-performance lighting solution designed for automotive applications. Featuring a robust construction with a quartz glass bulb and a precision-engineered filament, this bulb delivers a bright and focused beam for enhanced visibility and safety on the road. Its dual-filament design supports both high and low beam functions, providing optimal illumination for various driving conditions.

Technical Specifications

Lifespan	900 hours
Operating Voltage	12 V
Power Consumption	55/60W
Bulb Type	H4 Halogen

Features

Key Features

- Dual-filament design for high and low beam functionality
- Robust quartz glass construction
- Vibration resistant
- Standardized base for easy installation

Quality Standards	Better Conformity, Automotive Grade
