Product Overview

High-Performance H7 Halogen Bulb

The H7 halogen headlight bulb is a high-performance lighting solution designed for automotive applications. Featuring a robust filament and precise construction, this bulb delivers exceptional brightness and clarity, ensuring optimal visibility in various driving conditions. With a standard H7 base, it offers easy installation and compatibility with a wide range of vehicle models, providing reliable illumination for safer driving.

Technical Specifications

Lifespan	500 hours
Operating Voltage	12 V
Power Consumption	55 W

Features

Key Features

- Standard H7 base for easy installation
- Robust filament design
- Quartz glass envelope resists thermal shock and UV radiation
- Suitable for low and high beam applications

Application	Automotive, Low Beam, High Beam
