Product Overview

High-Performance H7 LED Solution

These H7 LED headlight bulbs offer a significant lighting upgrade over traditional halogen systems, delivering a safer and more focused beam pattern. Designed with an integrated driver and advanced heat radiation technology, they ensure both ease of installation and long-term reliability. With high color rendering and superior light output, these bulbs improve visibility and safety for drivers in various conditions.

Performance Metrics

Beam Distance

40 m

White Light Output

Color Rendering Index (CRI)	99 %
Efficiency Improvement	110 %

Technical Specifications

Socket Type	H7
Driver Location	Integrated (Inside lamp)
UV Protection	Yes

Design & Features

Key Features	Safe Beam Pattern, Special Heat Radiation Design, UV Free, Easy Installation, High Efficiency
Design Aesthetic	Special blue color finish
