

Halogen Convection Oven

This electric halogen convection oven offers versatile cooking options while reducing fat. It features a temperature range of 65-250°C and operates on 110V/240V power.

Product Overview

Efficient Halogen Convection Cooking

This halogen convection oven is designed for efficient and versatile cooking performance. With a generous 11.5-liter capacity and powerful 1300W heating element, it is well-suited for a variety of culinary applications. The unit features a wide temperature range, allowing for precise control over cooking results.

Technical Specifications

Power Consumption	1300 W
Voltage	110V, 240V
Frequency	50/60 Hz
Capacity	11.5 L

Performance

Temperature Range

65 °C

Minimum Temperature

250 °C

Maximum Temperature
