

Halogen Convection Oven Cooker

This convection oven cooker is a versatile kitchen appliance designed for efficient and healthy cooking. It operates on 110V/240V power supply at 50/60Hz with a power consumption of 1300W.

Overview

Professional Convection Cooking

The Halogen Convection Oven Cooker is a versatile and efficient kitchen appliance engineered for high-performance cooking. Utilizing advanced halogen heating technology and air circulation, it provides rapid, even heat distribution for roasting, grilling, and baking. With a compact 12-liter capacity and robust stainless steel construction, it serves as an excellent energy-efficient alternative to conventional ovens in professional or residential environments.

Technical Specifications
