Overview

Versatile Halogen Cooking Oven

This first-generation halogen oven offers a multifunctional solution for modern kitchens, capable of broiling, roasting, baking, grilling, steaming, and even defrosting. Utilizing advanced halogen heating technology with hot air circulation, it cooks food evenly and 2-3 times faster than standard ovens while saving up to 60% energy. The durable, transparent tempered glass bowl allows for clear monitoring of the cooking process, while the safety micro-switch ensures operation only when the handle is properly positioned.

Technical Specifications

Power Consumption	1400 W
Voltage	220-240V
Frequency	50-60Hz
Standard Capacity	12 L
Expanded Capacity	17 L

Features

Key Benefits

- Oil and fat-free cooking
- Non-radiative
- No soot generation
- Even heat distribution
- Fast cooking speeds

Cooking Functions	Broil, Roast, Bake, Grill, BBQ, Steam, Defrost, Disinfect
-------------------	---

Certifications

Compliance

CE • CB • GS • RoHS
