Overview

Versatile Halogen Cooking Oven

This first-generation halogen oven offers a multifunctional cooking solution that broils, roasts, bakes, grills, and steams without the need for excess oil. Designed for efficiency, it utilizes hot air circulation to cook food evenly and up to 2-3 times faster than standard ovens, saving up to 60% energy. The unit features a durable, transparent tempered glass bowl that allows for easy monitoring of the cooking process from all sides.

Technical Specifications

Voltage	220-240V
Frequency	50-60Hz
Power Rating	1400 W
Standard Capacity	12 L
Expanded Capacity	17 L

Features

Safety Features

- Micro-switch safety mechanism
- Lift handle to switch off
- Non-radiative cooking
- Heat resistant tempered glass

Certifications

CE • CB • GS • RoHS

Cooking Functions

Broil, Roast, Bake, Grill, BBQ, Steam, Defrost, Disinfect
