

Halogen-Free TPU Color Masterbatch

This halogen-free TPU color masterbatch is specifically designed for coloring thermoplastic polyurethane. It provides consistent color dispersion while adhering to halogen-free standards.

Product Overview

High-Performance Halogen-Free Color Masterbatch

This TPU-based color masterbatch is engineered to provide vibrant and consistent pigmentation while maintaining essential halogen-free standards. It is specifically designed for integration with thermoplastic polyurethane resins, ensuring high compatibility and color stability. Ideal for demanding industrial applications, this solution offers both environmental compliance and superior aesthetic performance.

Material Composition

Base Resin	TPU (Thermoplastic Polyurethane)
Compliance & Features	Halogen-Free, Color-Fast, Industrial Grade

Technical Specifications

Masterbatch Type	Color Masterbatch
