

Halogen Security Floodlight with PIR Motion Sensor

This halogen floodlight provides bright illumination for enhanced security. Equipped with a 180° PIR motion sensor, it automatically activates upon detecting movement.

Overview

High-Intensity Security Illumination

This high-intensity halogen security floodlight is engineered for robust outdoor performance, providing a bright and wide beam of light to significantly enhance visibility and security. Equipped with an integrated 180° Passive Infrared (PIR) motion sensor, the unit offers automated illumination triggered by movement detection. Constructed with durable, weather-resistant materials, it is a reliable solution for both residential and commercial security applications.

Technical Specifications

Adjustable Settings

- Sensor sensitivity
- Duration settings

Build Quality

Weather-Resistant • Durable Construction

Sensor Type

180° Passive Infrared (PIR)

Application Areas

Residential Security, Commercial Security, Outdoor Lighting
