

Halogen Space Heater

This compact halogen space heater is designed for personal use. It features adjustable power settings and directional heating.

Overview

Compact Personal Heating Solution

The PHC156 halogen space heater is designed for efficient, personal-scale warmth in small environments such as offices, bedrooms, or workshops. It features a robust, durable construction equipped with a protective safety grill to prevent direct contact with heating elements. Users can easily customize their comfort level using intuitive rotary controls, while the adjustable stand ensures heat is directed exactly where it is needed most.
