

Halogen Space Heater for Indoor Use

This halogen heater is designed for indoor use. It utilizes halogen tubes to provide efficient and directional heating with adjustable settings.

Product Overview

Efficient Indoor Heating

The QH-1200A halogen heater is designed to provide rapid, directional warmth for indoor environments. Featuring multiple high-efficiency halogen tubes, this unit offers adjustable heating intensity through a simple rotary knob. Its portable design, combined with a stable base, ensures it can be easily moved and safely used as a reliable supplemental heating solution for various indoor spaces.
