

Hand Crank Solar Emergency Radio

This portable radio receives AM/FM bands and can be powered by a hand crank, solar panel, or optional external adapter. It features a digital display for the frequency.

Overview

Reliable Emergency Connectivity

This Hand Crank Solar Emergency Radio is a robust, eco-friendly solution designed for critical communication and utility during power outages or outdoor activities. By utilizing integrated solar panels and manual hand-cranking, it ensures the device remains powered without the need for traditional batteries. Additionally, it features multifunctional capabilities including digital tuning, timekeeping, and mobile device charging to keep you connected when it matters most.
