

# Hand File

This hand file is designed for shaping, smoothing, and deburring metal, wood, and plastic. It features a high-carbon steel blade for durability and precision.

## Product Overview

### Professional Grade Hand File

This versatile hand file is engineered for precision shaping, smoothing, and deburring across a variety of materials including metal, wood, and plastic. Constructed with a high-carbon steel blade, it ensures long-lasting durability and consistent performance for demanding tasks. The ergonomic handle design promotes a secure and comfortable grip, effectively reducing user fatigue during extended professional or workshop applications.
