Product Overview

Versatile Chemical Transfer Solution

This hand-operated chemical transfer pump is engineered for efficient fluid management in industrial and agricultural environments. Built with durable, corrosion-resistant materials, it offers reliable performance for dispensing liquids from drums, barrels, and tanks. The ergonomic design ensures comfortable operation, while the adjustable telescopic suction tube accommodates various container depths for maximum utility.

Technical Specifications

Flow Rate

20 L

Volume per 52 Strokes

Suitable Liquids

- Lubricant (under #35 / ISO VG100)
- Water
- Alcohol
- Volatile liquids

Safety Constraints

Do not pump lubricant over ISO VG100 • Do not pump lubricant over #35

Construction Materials

Polypropylene, Steel Rod

Logistics & Packaging

Packaging Specifications

Metric	Value
Quantity per Carton	6 PCS
Gross Weight	6.7 KGS
Net Weight	6.0 KGS
Dimensions (L x W x H)	38.5 x 32 x 28.5 CM
