

Hand Operated Stainless Steel Oil Pump

This hand-operated oil pump is constructed from stainless steel and aluminum. It is suitable for transferring various fluids including oil and features a hand crank for manual operation.

Product Overview

Professional Fluid Transfer Solution

This hand-operated oil pump is engineered from high-quality stainless steel and aluminum, offering superior durability for industrial fluid transfer tasks. Designed for versatility, the unit includes an integrated hand crank mechanism and adjustable extension tubes to accommodate various container depths. It serves as an essential tool for workshops and garages, ensuring reliable and efficient handling of oils and other compatible liquids.

Technical Specifications

Included Components

- Extension tubes
- Filter
- Connector

Materials	Stainless Steel, Aluminum
Operation	Manual Hand Crank

Applications

Ideal Environments

Workshops • Garages • Industrial Settings
