

Hand Pick with Fiberglass Handle

This pick features a plastic-coated fiberglass handle for durability and a comfortable grip. It is designed for digging and breaking applications, offering strength and ease of use.

Overview

Professional Hand Pick

This hand pick is engineered for demanding digging and breaking applications, combining robust performance with ergonomic design. Featuring a high-quality fiberglass handle with a specialized plastic coating, it effectively minimizes vibration during impact to ensure user comfort. This tool offers an ideal balance of strength and control, making it a reliable choice for various heavy-duty construction and landscaping tasks.

Construction & Materials

Handle Material	Fiberglass with plastic coating
Handle Features	Vibration Reduction, Improved Control, Durable Grip
