

Hand Saw for Boards and Panels

This hand saw is designed for precise cutting of boards and panels. The rigid, thin blade ensures clean and accurate cuts, minimizing splintering and material waste.

Product Overview

Precision Cutting Solution

The board saw 3103 is a specialized hand tool engineered for the precise cutting of boards and panels. Featuring a rigid, thin blade, it is designed to deliver clean and accurate cuts while significantly minimizing material splintering and waste. Its ergonomic handle ensures a comfortable and secure grip, enhancing user control and reducing fatigue during extended carpentry tasks.

Best For

Woodworking, Cabinet Making, Fine Carpentry, Panel Cutting

Technical Specifications

Blade Characteristics

- Rigid construction
- Thin profile for precision
- Designed for minimal splintering

Ergonomics

Ergonomic Handle • Secure Grip • Fatigue Reduction
