

Hand Saw with Toothed Blade

This is a hand saw designed for cutting through various materials. It features a toothed blade and a handle for manual operation.

Product Overview

Professional Hand Saw for Construction

This hand saw is designed specifically for demolition and building applications, featuring a robust toothed blade for efficient cutting. The ergonomic red handle provides a secure grip, ensuring precision and control during manual tasks. It is an essential tool for professional builders and contractors requiring reliable performance on the job site.
