

Hand Smoothing Plane

This hand plane is designed for smoothing wood surfaces. It features a cast metal body and adjustable blade for controlled operation and fine finishes.

Product Overview

Precision Woodworking Performance

This professional-grade hand smoothing plane is engineered for achieving exceptional surface finishes on a variety of wood types. Designed with a robust cast metal body and ergonomic handle, it provides the stability and control necessary for precise material removal. An adjustable blade depth mechanism ensures versatility, making this tool an essential addition to any woodworking workshop focused on high-quality craftsmanship.
