

Hand Tractor Rotary Tiller Attachment

Rotary tiller attachment designed for use with hand tractors, featuring a robust construction for soil preparation and cultivation. The implement is equipped with multiple tines for efficient tilling and adjustable depth control for varied soil conditions.

Product Overview

Robust Soil Cultivation

This rotary tiller attachment is specifically engineered for hand tractors, offering a reliable solution for soil preparation and cultivation tasks. Designed with a focus on efficiency, it features multiple tines that ensure thorough soil aeration and breakdown. The attachment includes adjustable depth control, allowing operators to adapt to various soil conditions with ease, while the protective housing ensures safety during operation.

Technical Specifications

Key Features

- Robust construction for durability
- Multiple tines for efficient tilling
- Adjustable depth control
- Safety protective housing

Compatibility	Hand Tractors
Primary Application	Soil preparation and cultivation
