

Handheld Alcohol Tester with Digital Display

This is a handheld alcohol tester with a digital display. It is designed for personal use to measure blood alcohol content.

Product Overview

Compact Alcohol Monitoring Solution

This handheld alcohol tester is designed for quick and reliable blood alcohol concentration (BAC) monitoring. It features a dual LCD display that conveniently shows both alcohol test results and a clock with a built-in parking timer function. With its compact design and rapid response time, it serves as an efficient tool for personal safety and awareness.

Technical Specifications

Sensor Technology	Advanced semiconductor oxide alcohol sensor
Measurement Range	0.00% - 0.19% BAC
Test Accuracy	0.01% BAC

Performance Metrics

Key Performance Metrics

22.5 s Warm-up Time	5 s Response Time	1 min Auto Power Off
-------------------------------	-----------------------------	--------------------------------

Physical Attributes

Dimensions	100 x 37 x 17 mm
------------	------------------

Power and Compatibility

Power Requirements

- 2 x AAA alkaline batteries (for device)
- 1 x AG13 cell battery (for clock)

Additional Features

Built-in Functions	Double LCD Display, Clock Alarm, Parking Timer
