Overview

Professional Disinfection Solution

This handheld automatic disinfection fogger is designed for efficient sterilization across various environments, including homes, offices, vehicles, and hotels. By utilizing advanced fogging technology, it dispenses a fine mist that ensures thorough coverage, effectively removing odors and eliminating harmful bacteria. The device features a user-friendly interface, dry-burn protection for safety, and versatile control options for professional-grade sanitation.

Technical Specifications

Power Consumption	900 W
Operating Voltage	AC 220V/50Hz (AC 110V/60Hz optional)
Liquid Capacity	100 ml
Effective Coverage Area	100 m ²

Features & Controls

Safety Features

Dry-burn protection • Long-life design

Control Options

Wire Control, Remote Control, Automatic, Timer

Applications

Suitable Environments

- Residential / Home
- Office Spaces
- Automotive / Vehicles
- Hotels
- Hypermarkets / Retail
