Product Overview

The handheld spinning disc sprayer unit, designed for precision liquid application.

High-Efficiency ULV Spraying

The Handheld Battery-Powered ULV Sprayer is a robust, spinning-disc Controlled Droplet Application (CDA) tool designed for precision liquid distribution. It utilizes gravity-fed technology with color-coded nozzles to ensure accurate application rates of 1-3 litres per hectare. Engineered for portability and extended operation, it offers up to twenty hours of spraying time on a single set of batteries, making it an ideal solution for agriculture, sanitation, and pest control applications.

Technical Specifications

Technology Type	Spinning Disc Controlled Droplet Application (CDA)
Power Source	D-cell/R20 Batteries
Spraying Time	20 hours
ULV Application Rate	1-3 litres/hectare
Liquid Feed System	Gravity-fed with color-coded nozzles

Accessories & Options

Available Accessories

- Micropak Backpack
- Refilling system
