

Handheld Cable Cutter for Copper and Aluminum

This hand cable cutter is designed for cutting copper and aluminum cables. Its high-leverage design ensures efficient cutting with minimal effort.

Product Overview

Professional Grade Cutting Solution

This heavy-duty, hand-operated cable cutter is engineered specifically for clean and efficient cutting of copper and aluminum cables. Featuring a high-leverage design, it allows operators to achieve precise cuts with minimal physical effort. The tool is built with hardened steel blades for durability and ergonomic handles for a secure grip, making it an essential instrument for electrical work, construction, and industrial maintenance applications.

Technical Specifications

Model Number	TC-1250
Compatible Materials	Copper, Aluminum

Key Features

Design Highlights

- High-leverage mechanism for reduced effort
- Hardened steel blades for precision
- Ergonomic handle design for user comfort
- Durable construction for industrial use

Primary Applications

Electrical Work • Construction • Industrial Maintenance
