

# Handheld Ceramic-Coated Steam Brush

This handheld steamer has a maximum power of 1200-1400W and operates at 220-240V. It delivers continuous steam at 22g/min from its 60ml capacity water tank, with steam emitted through a ceramic-coated panel.

## Product Overview

### Efficiency and Precision

This handheld ceramic-coated steam brush is designed for efficient fabric care, offering powerful performance in a compact form. Featuring a heated ceramic-coated steam panel, it ensures smooth gliding and gentle treatment for various textiles. With 1200-1400W of power, it delivers consistent results, making it an ideal tool for professional settings.

## Technical Specifications

### Power Output

**1400 W**

Maximum Power

Operating Voltage	220-240V
Steam Output Rate	22 g/min
Water Tank Capacity	60 ml

## Design and Build

Steam Panel	Heated, Ceramic Coated
Physical Dimensions	252 x 107 x 241 mm
