Product Overview

Professional Handheld Die Grinder

This high-performance die grinder is engineered for precision grinding, polishing, and deburring tasks across metalworking, automotive, and construction sectors. Its compact and ergonomic design allows for superior control and maneuverability, even when working in tight, confined spaces. Featuring a durable and powerful motor, this tool provides reliable performance for a wide range of material machining applications.

Technical Specifications

No-Load Speed

25000 r/min
Max Speed

Power Output	300 W
Operating Voltage	220V-240V
Frequency	50Hz-60Hz

Usage & Applications

Supported Tasks

- Grinding
- Polishing
- Deburring
- Sanding
- Honing
- Machining

Ideal For	Metalworking, Woodworking, Automotive, Construction, DIY Projects
