

Handheld Electric Milk Frother with Stand

This electric milk frother is a handheld device for frothing milk for beverages. It features a stainless steel whisk and comes with a stand for storage.

Product Overview

Professional Milk Frothing at Home

This handheld electric milk frother is designed to quickly and efficiently create cafe-quality foam for lattes, cappuccinos, and macchiatos. Its compact, ergonomic design ensures comfortable handling during use, while the stainless steel whisk attachment provides durability and effective aeration. Perfect for both home kitchens and small office environments, this device includes a convenient storage stand to keep your workspace tidy.
