

Handheld Garden Cultivator Tiller

The handheld garden cultivator tiller is a compact tool designed for loosening soil, removing weeds, and preparing seedbeds in small gardens and flower pots. It features a durable metal construction with three curved tines that efficiently break up compacted soil.

Product Overview

Compact Gardening Efficiency

The handheld garden cultivator tiller is a versatile tool engineered for loosening soil, removing weeds, and preparing seedbeds in small gardens and flower pots. Crafted with durable metal and featuring three curved tines, it effectively breaks up compacted soil while maintaining a lightweight profile. The ergonomic handle is designed to provide a comfortable grip, significantly reducing hand fatigue during extended gardening sessions.

Technical Specifications

Material	Durable Metal
