## Overview

### Rugged Guard Tour Management

This handheld guard tour reader is a professional-grade device engineered for reliable patrol route monitoring and security verification. Featuring a robust, screwless exterior and IP67-rated protection, it is built to withstand challenging environments. The device integrates advanced scanning technology with an intuitive LED display and built-in flashlight, ensuring seamless operation for security personnel during both day and night shifts.

## Technical Specifications

Rugged, screwless design built for durability and vandal resistance.

Optimized power management system delivering extended battery life for long-term field use.

Designed to maintain reliable operation in demanding and harsh environments.

### Protection Rating

IP67 • Vandal Resistant

### Battery Performance

- Up to 26 days standby (500 readings/day)
- Up to 4 days operation (500 readings + 2 hours lighting/day)

### Battery Capacity

1150 mAh

### Battery Voltage

3.7 V

## Features

Ergonomic interface featuring a clear LED screen and integrated USB communication.

Real-time feedback on the LED display with built-in flashlight for low-light conditions.

### Operational Metrics

**500 readings**

Daily Reading Capacity

### Key Features

LED Display, Built-in Flashlight, USB Communication, Gilded Contact USB, Real-time Data Logging
