

Handheld Material Property Meter

This is a handheld meter for measuring physical properties. It uses an external probe to measure material characteristics in the field.

Product Overview

Precision Field Measurement

This handheld material property meter is engineered for professionals requiring accurate, on-site diagnostics. Featuring a robust design with an external probe, it offers the portability needed for field operations while maintaining high measurement reliability. Its intuitive interface and durable construction make it an essential tool for assessing material characteristics in various industrial and environmental settings.

Technical Specifications

Device Type	Handheld Physical Measuring Meter
Probe Type	External probe with dual metal prongs
Portability	Yes

Compliance & Safety

Safety Indicators	Warning Label Present, Serial Number Tracked
