

Handheld Patrol Scan Device with Fingerprint Authentication

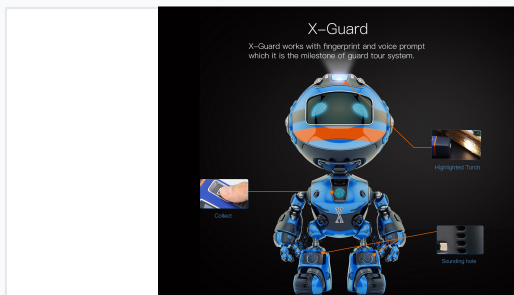

This handheld device is designed for access control and security applications. It features fingerprint authentication, a display screen, and a durable design for reliable monitoring and data collection.

ADDITIONAL IMAGES

Overview

The X-Guard system features advanced fingerprint collection and a built-in high-intensity torch for night patrols.

Secure fingerprint authentication eliminates buddy punching and ensures verifiable patrol data.

Advanced Guard Tour System

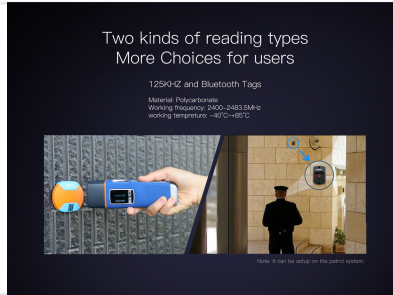

This handheld patrol scan device features integrated fingerprint authentication to ensure verifiable and secure guard tours, effectively eliminating issues like buddy punching. Designed for durability in harsh environments, it combines robust construction with intelligent features like voice prompts and a high-intensity torch. The system is supported by flexible scheduling software, making it an ideal solution for comprehensive security monitoring and access control.

Key Features

Core Technologies

Fingerprint Authentication, Voice Prompt Feedback, Integrated Torch, Bluetooth Connectivity

Technical Specifications

The device supports dual reading types (125KHz and Bluetooth) and operates in extreme temperatures.

Supported Reading Types

- 125KHz RFID
- Bluetooth Tags

Operating Temperature	-40 °C
Max Operating Temperature	85 °C
Working Frequency	2400-2483.5 MHz

Build & Durability

Engineered for military-grade durability with aluminium alloy and water-resistant internal components.

Durability Features

Water-resistant Lining • Rubber Bladder • Impact Resistant

Materials	Aluminium Alloy, ABS Plastic, Polycarbonate
-----------	---

Software & Management

Comprehensive management software allows for flexible scheduling, from hourly to yearly patrol plans.

Scheduling Options

- Hourly
- Daily
- Monthly
- Yearly
- Special Rest Days

Kit Contents

The complete kit includes all necessary hardware and software for immediate deployment.

Standard Package Includes

Item	Function
Reader	Data Collection
Cable	Data Transfer
Charger	Power
Software	Analysis & Reporting
Manual	Guidance
