

Handheld Personal Cooling Device

This handheld personal cooling device is designed for cooling and refreshment. It features a sleek, ergonomic design and incorporates advanced cooling technology.

Product Overview

Advanced Personal Cooling Technology

This handheld cooling device is designed for efficient, targeted refreshment. Utilizing advanced cooling technology, it allows for rapid temperature reduction, reaching approximately 5 degrees in a short amount of time. Its ergonomic, compact design ensures it is easy to handle and maneuver for various personal care applications, including pore shrinkage.

Technical Specifications

Cooling Performance

5 °C

Minimum Temperature

Power Source	Wired (Power Cord)
Key Features	Handheld, Ergonomic Design, Pore Shrinking, Compact
