

Handheld Security Metal Detector

This is a handheld metal detector used for security and detection. It has a sensitivity adjustment button and operation switch for selecting vibration or audio alerts.

Product Overview

Professional Security Screening

This handheld metal detector is designed for high-precision security screening in diverse environments, including airports, government buildings, schools, and event venues. It offers reliable detection capabilities, capable of identifying small metal objects like a 25-cent coin with ease. With dual alert modes featuring sound and vibration, this device ensures discreet and effective operation for security personnel.

Technical Specifications

Coin Detection Sensitivity

50 mm

25 Cent Coin

Pipe Detection Sensitivity

100 mm

20mm Iron Pipe

Operating Frequency

17 kHz

Tuning

Automatic

Physical Characteristics

Dimensions

370 x 78 x 38 mm

Weight

330 g

Power & Environment

Power Supply

9V, 6F22 or equivalent

Quiescent Operating Current

6 mA

Operating Temperature

0 to 50°C

Relative Humidity

<85%

Features

Common Applications

- Airports
- Industrial Sites
- Government Buildings
- Schools
- Hospitals
- Conferences
- Nightclubs
- Sporting Events

Alert Methods

LED Light, Audio Alarm, Vibration
