

Handheld Sprayer Bottles for Agriculture

These handheld bottles are designed for spraying applications in agriculture and gardening. They are suitable for dispensing liquids such as water, pesticides and fertilizers.

Product Overview

Versatile Agricultural Spraying Solutions

These handheld sprayer bottles are designed for precision application in gardening and agricultural settings. Featuring adjustable nozzles, they allow users to switch seamlessly between mist and stream patterns for effective distribution of water, pesticides, or fertilizers. The durable construction and ergonomic design ensure reliability for both professional and home-use applications.

Design & Build

Design Variations

- Green ribbed textured bottle
- White smooth conical bottle

Primary Applications

Gardening, Agriculture, Pesticide Application, Fertilizer Dispensing, Irrigation

Technical Features

Nozzle Type

Adjustable spray nozzle for variable spray patterns

Material

Plastic
