

Handheld Tube Bender

This handheld tube bender is made from high-quality aluminum, making it lightweight and easy to transport. The adjustable hook and ergonomic handle are designed for comfortable and easy bending.

Product Overview

Professional Handheld Tube Bender

The VBT-1 is a hand-operated bending tool designed for creating precise bends in various materials. It features a robust construction with durable handles for enhanced leverage and control. Its compact design and ease of use make it suitable for both on-site and workshop environments, ideal for professionals requiring accurate and consistent bending results.
