

Handheld UV Disinfection Wand with Rotating Head

This UV disinfection device features a handheld wand with a rotatable UV-C light source. It comes with a base unit for storage and charging.

Product Overview

Versatile UV-C Sanitization

The handheld UV disinfection wand provides a flexible solution for maintaining hygiene on various surfaces and consumer electronics. Featuring a unique rotating head capable of 0 to 180 degrees, it ensures optimal UV-C coverage for items of different shapes and sizes. The device comes with a dedicated base unit that serves as both a convenient storage dock and a charging station.
