

Handheld UV Mite Vacuum Cleaner

This handheld vacuum cleaner is designed for removing dust mites and allergens. It features UV sterilization and HEPA filtration.

Product Overview

Deep Cleaning Performance

This handheld UV mite vacuum cleaner is engineered for effective allergen removal from mattresses, upholstery, and soft surfaces. Combining powerful suction with UV sterilization technology, it targets dust mites and bacteria to ensure a healthier living environment. The device features a washable HEPA filtration system and an ergonomic design for convenient, thorough cleaning.
