Product Overview

Professional Mite Elimination Solution

This handheld UV vacuum cleaner is engineered for high-efficiency sanitization and allergen removal. By combining a powerful suction motor with UV light sterilization and reflection technology, it effectively inhibits bacterial growth on mattresses, sofas, and upholstery. Its ergonomic design and safety-focused features make it an essential tool for maintaining hygienic living environments.

Technical Specifications

Motor Wattage	300 W
Vacuum Pressure	10 Kpa
Dust Bin Capacity	0.2 L
Power Requirements	100-240V / 50-60Hz
Cord Length	4 m

Performance Features

Sanitization Technology

- UV-C sterilization
- Double-exposure reflective light technology
- HEPA filtration system
- Mite-inhibiting performance

Compliance Standards	CE, CB, GS, RoHS
