

Hanging Gazebo Heater

This hanging heater provides warmth in outdoor gazebos. It uses radiant heat to keep a surrounding area warm and comfortable.

Product Overview

Efficient Outdoor Heating Solution

This hanging gazebo heater is designed to provide consistent, comfortable radiant heat for outdoor living spaces such as gazebos and covered patios. Its compact, dome-shaped reflector design ensures effective heat distribution in a downward direction, making it ideal for localized warmth. The unit is electrically powered and features a simple pull-cord operation, offering a convenient and reliable heating solution for seasonal use.
