

Hanging Gazebo Infrared Heater

The hanging gazebo heater is designed for outdoor use, providing warmth to gazebos and patios. It features electric infrared heating elements and a reflective metal shade for efficient heat distribution.

Product Overview

Efficient Outdoor Heating Solution

This hanging gazebo infrared heater is engineered to provide targeted, efficient warmth for outdoor environments such as patios, gazebos, and open-air seating areas. Designed with a circular, reflective metal shade, it effectively directs heat downwards to maximize comfort in localized spaces. The unit operates using electric infrared heating elements, offering a clean and reliable heating source that is easy to control via the integrated base unit.

Technical Specifications

Heating Technology	Electric Infrared
Installation	Suspended by chain

Design & Build

Design Features	Circular Shade, Reflective Metal, Outdoor Rated
Control Unit	Integrated black control unit at base

Applications

Suitable Environments

- Gazebos
- Patios
- Outdoor Seating Areas
