

Hardened Steel Combination Chain Lock

This chain lock is suitable for securing bicycles, e-bikes, and motorcycles. It features a hardened steel chain and a combination lock for enhanced security.

Product Overview

High-Security Hardened Steel Chain Lock

This hardened steel combination chain lock is engineered for maximum security in urban environments, making it an ideal choice for bicycles, e-bikes, and motorcycles. The chain is constructed from robust, hardened steel designed to resist cutting and tampering attempts. It features a protective, weather-resistant fabric sleeve that prevents scratches to the vehicle frame, ensuring both security and aesthetic preservation.
