

Hardened Steel Pry Bar

This high-strength steel crowbar is designed for prying, lifting, and demolition tasks. It is constructed from hardened steel for durability and resistance to bending or breaking.

Product Overview

Professional Grade Hardened Steel Pry Bar

This high-strength steel crowbar is engineered for demanding prying, lifting, and demolition tasks in construction and renovation environments. Constructed from premium hardened steel, it offers exceptional resistance to bending and breakage under pressure. The versatile design includes a flattened chisel end for precise insertion and a curved end for maximum leverage, making it an essential tool for professional contractors and emergency response teams.

Technical Specifications

Ideal Applications

- Construction
- Renovation
- Demolition
- Emergency Services

Material	Hardened Steel
Key Features	Flattened Chisel End, Curved Leverage End, High-Strength Steel, Bend Resistant
