

Hardened Steel Putty Knife with Ergonomic Handle

This tool features a robust, flat blade, ideal for scraping, prying, or spreading materials. The handle is ergonomically designed for a comfortable grip and efficient force transfer.

Product Overview

Professional Hardened Steel Putty Knife

This professional-grade putty knife features a robust, hardened steel blade designed for long-lasting durability and resistance to wear. Engineered with an ergonomic handle, it ensures a comfortable grip and efficient force transfer during intensive use. The precision-ground edge and tapered profile allow for superior performance when removing adhesives, paint, or surface coatings in both open areas and tight spaces.

Technical Specifications

Blade Material	Hardened Steel
Edge Finish	Precision-ground

Key Features

Design Advantages

- Ergonomic handle for force efficiency
- Tapered blade profile for tight spaces
- Hardened steel for wear resistance
- Suitable for scraping, prying, and spreading

Applications

Primary Applications	Paint removal, Adhesive scraping, Surface coating removal, Prying applications
